

PROFILE

SAP Business One consultant of 10+ years who also designs, builds and runs a production AI-music platform single-handedly — from ERP data models to payments, live streaming and AI agents.

I enjoy helping people improve their working experience by designing fit-to-customer solutions and implementing them end to end — from intake and problem analysis through proposal, build, reporting and aftercare. I favour long-term relationships and seeing a single project through from start to finish.

EXPERIENCE

Founder, Architect & Sole Engineer 2025 – Present
AI PLAY (aipay.live)

- Designed, built and operate a live AI-music platform end to end — product, database, API, front end, infrastructure and support
- Built a credit economy and Stripe Connect marketplace with automated creator payouts, backed by a double-entry ledger
- Handle EU VAT, DAC7 platform-operator reporting, GDPR export/erasure and DMCA takedowns
- Shipped real-time features: WebRTC voice and video, HLS live streaming and 24/7 radio stations
- Built an AI agent layer on the Claude API with MCP tool-calling, persona memory and metered usage billing
- Ran a full security review and remediation pass across the platform, then hardened it at the edge
- Localised the product into 14 languages

2,500+ registered users, 1,674 sessions hosted and 56,000+ song submissions — run by one person.

SAP Business One Consultant Jul 2020 – Present
Amista (formerly Zeibur)

- Install and configure business applications built on SAP
- Supervise and maintain MSSQL / HANA backups and SQL / HANA servers
- Advise on and resolve issues across software implementations
- Train Keyusers on SAP functionality
- Build reporting with a range of methods and tools
- Develop customer-specific customisations in SAP Business One with B1up

Delivered a full SAP Business One implementation in Singapore (2023) for Mr Marine.

SAP Business One Consultant Jul 2022 – Apr 2023
Amadys

- Multiple SAP Business One implementations for newly acquired companies

Business Process Automation Consultant Oct 2019 – Dec 2021
Ask-Us

- Business process automation on the BPA Platform
- Integrations across webshops, ERP systems, marketing applications and email

AI PLAY IN NUMBERS

2,509 registered users
1,674 sessions hosted
56,572 song submissions
29,471 unique tracks
14 languages shipped
Designed, built and operated by one person.

Freelance / Various

- Web development and support for a range of clients

Notable clients: Perfect Manicure & Nailstyling · MiYoshi · Wo Men's Luxury

ENGINEERING TRACK RECORD

Evidence from AI PLAY — a production platform I own end to end.

End-to-end ownership

- Sole architect of a live platform serving thousands of users
- React + TypeScript front end on a Hono/Node API
- PostgreSQL schema design with Drizzle, migrations and backups
- Self-hosted Linux: Docker, Caddy, systemd, Cloudflare

Security engineering

- Authorisation and IDOR remediation across API surfaces
- Two-step credential reset and account-enumeration hardening
- Rate limiting, WAF rules and least-privilege database roles
- End-to-end verification suite run against every fix

Payments, tax & compliance

- Stripe Connect marketplace with automated creator payouts
- Double-entry credit ledger as the single source of truth
- EU VAT handling and DAC7 platform-operator reporting
- GDPR data export & erasure, consent management, DMCA workflow

Real-time & AI infrastructure

- WebRTC voice & video with a hardened TURN relay
- HLS live streaming and 24/7 Liquidsoap radio stations
- Anthropic Claude integration with MCP tool-calling agents
- Generative media pipelines and a full Discord bot suite

STRENGTHS

- Comprehends and reshapes the configuration of software applications and web services
- Highly motivated, self-driven, and an excellent team player
- Goal-oriented and composed under pressure
- Complex thinker who analyses and solves complicated problems with ease
- Thrives on customer contact and culturally diverse environments
- Patient and relentless
